~~Approaching~~ Leaving Mine drop heading to MOD shack

Did the Involved Party do something to draw attention prior to the incident? (i.e. Make noise? Say something?)

None

Comments you heard made by the Involved Party at the scene:

DESCRIPTION OF INCIDENT

Describe what you observed: When I returned [Redacted] for break I finished the group [Redacted] started and proceeded to let in the Next group. They were excited and ~~was~~ moving past me before I could stop them there was about a dozen people in the room I was able to get extra people out and when I turned around they were all seated so I walked threw strapping them in. When I went to start the cycle it told me 1 of the restraints hadn't been cycled. I checked the restraint and those around it and they were all locked. When I went back to the terminal it still showed the restraint hadn't been cycled and that is when [Redacted] returned from break. I asked [Redacted] why it was going off [Redacted] said to just restart and try again. [Redacted] unlocked restraints and pulled them out noise.

I re-locked restraints and walked in to help [redacted] lock restraints. I double checked the right to passengers and went to double check third but saw [redacted] was right there also and so I didn't crowd [redacted]. I walked to the end of the room to check terminal. Everything was good. [redacted] told me I could go so I left. I walked to the MOD shack and clocked out and as I was leaving heard one of the leads yell to some other employees that they would meet them down there as a few people took off towards the Giant Canyon ^{Swiss} ~~As~~ As I got to bottom of ~~the~~ gondola I had a lot of Sirens so I asked the employee at the bottom what happened and [redacted] said [redacted] thought [redacted] heard them say someone Fell down Mine Dr.
